

MT FOX ENERGY PARK

Summer 2023

Community meetings

18 December 2023, 4:30pm
6 January 2024 12:00
Mt Fox Community Shed

Employment

We are accepting expressions of interest for contracts related to construction of the BESS and wind farm.

Community benefit

We are seeking expressions of interest for community and ecological benefit programs.

Quick fact

MFEP is an entirely Australian-owned venture, developed in partnership with local landowners.

Our mission

Our mission is twofold: to mitigate carbon emissions by generating and storing renewable energy while concurrently revitalising the land. Through the removal of invasive species, restoration of native flora, and safeguarding nesting and breeding grounds across more than 800 hectares of preserved space, we are creating optimal environments for local vulnerable species. Our goal is to metamorphose the project site into a thriving habitat for native flora and fauna, fostering increased biodiversity and abundance, all while producing and storing renewable energy.

At a glance

- 300MW battery energy storage system (BESS).
- 47 Wind Turbines generating approximately 290 MW of clean energy.
- Estimated \$30.5 million contribution to local, regional and state economies over the project lifespan.
- Approximately 200 jobs during construction and 10 - 15 permanent positions ongoing.
- Over 800 hectares of rehabilitated and protected land, creating increased habitat for vulnerable native species.
